

FATHER'S DAY

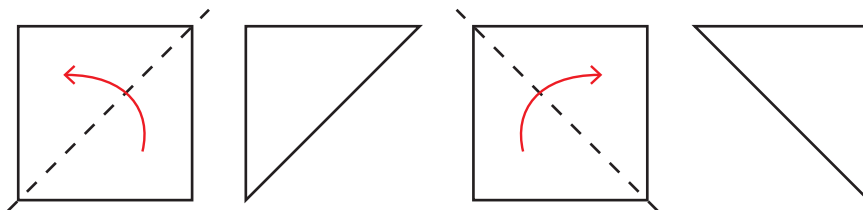

EXPLODING POP-UP CARD

Materials

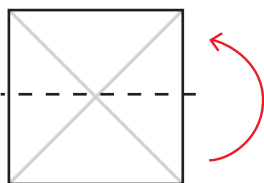

- scissors
- glue
- coloured pencils, markers or crayons
- Father's Day Exploding Pop-up Card Template
- A5 sheet of card (or A4 piece of card cut in half)

Instructions

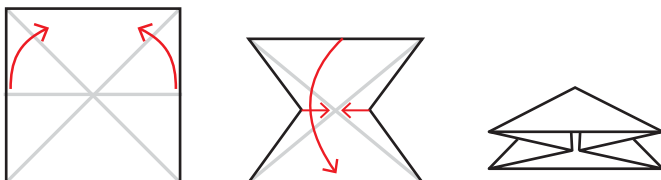

1. Draw a comic book inspired design on the template, then colour the template and the decorations.
2. Cut along the straight line to separate the template from the decorations.
3. Fold the template diagonally in both directions, unfolding each time.

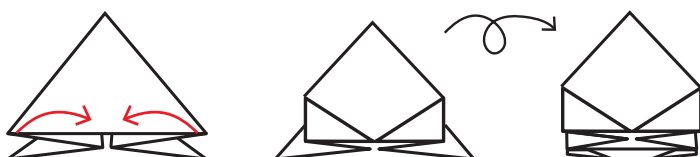

4. Fold the template in half horizontally keeping the design visible. Then unfold.

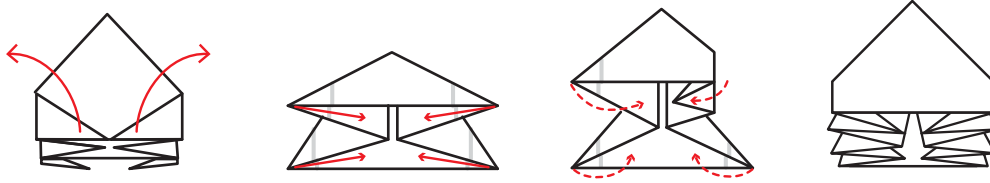

5. Bring the sides of the template up and in, to create a folded triangle.

6. Fold the tips of the triangle into the centre. Repeat on the other side.

7. Unfold the tips from the outside and then fold them inside the template. (This can be a little tricky but you will get there!)

8. Unfold once again and use scissors to snip around the outline of the template. Then fold it back together.
9. Fold your A5 piece of card in half to create a card. Place the folded template inside the card. Glue the template to the inside of the card.
10. Write a thoughtful message on either the top or bottom part of the card.
11. Cut out the additional decorations and stick them on the inside and outside of your card. For best results, try not to paste them over a fold line.
